

2021-2022
CSE 305 – SOFTWARE ENGINEERING COURSE PROJECT
MIDTERM PRESENTATION

ELIHAN TECH

Elize Hamitoğlu 181805052
&
Nagihan Baz 171805024

A long-exposure photograph of a night sky over the ocean. The sky is filled with stars and constellations. A green aurora borealis is visible on the left side of the horizon. Several city lights are visible along the horizon, including a bright yellow light on the right. The ocean is dark and calm.

Look At The Sky

Content

- What is the purpose of the project?
- Who are the users of the project and what are their needs?
- What are the main functional requirements of the project?
- Use-Case Diagram
- What are the main non-functional requirements of the project?
- What are the highlights of the product backlog and sprint planning strategies?
- What did we learn about interacting with the customer, teamwork and other non-technical aspects of the project?

Use-Case Diagram

What are the main non-functional requirements of the project?

Product Requirements:

- Performance Requirements:
- ☐ Available 7/24.
- ☐ Run fast enough on any operating system for personal computer.
- Security Requirements:
- ☐ If someone does not enter long time, that user is going be removed from the system.
- Usability Requirements:
- ☐ User-friendly interface.
- ☐ The platform can be used by any people.

Organizational Requirements:

- Operational Requirements:
- ☐ Look At The Sky works well in any Internet browser.

What are the highlights of the product backlog and sprint planning strategies?

- First Sprint

- Log In

- Log Out

What are the highlights of the product backlog and sprint planning strategies?

- Second Sprint
 - Horoscope
 - Tarot

What are the highlights of the product backlog and sprint planning strategies?

- Third Sprint
 - Announcement
 - Test

What are the highlights of the product backlog and sprint planning strategies?

- Fourth Sprint
 - Game
 - Delete User
 - Learn Zodiac Sign

What did we learn about interacting with the customer, teamwork and other non-technical aspects of the project?

- Agile project management
- We discovered our strengths.
- The importance of different ideas.
- Feedback from customers improved the project.

A long-exposure photograph of a night sky filled with stars. The horizon is visible, with a series of green lights on the left and a single bright orange light on the right. The sky transitions from a deep blue at the top to a lighter blue near the horizon.

Thank you for listening.
